FULL STACK DEVELOPER

I build modern and user-friendly web applications using **Laravel**, **React.js**, and **Inertia.js**. I have experience creating custom eCommerce websites with features like product listing, secure checkout, and order tracking. I work with **CMS systems**, and make sure websites run fast and smooth. I follow the **MVC pattern**, use **REST APIs**, and create clean designs using UI frameworks like **Tailwind CSS** and **Bootstrap**.

Technical Skills: PHP, JavaScript, Laravel, Inertia.js, Tailwind CSS, React.js, MySQL

EXPERIENCE

Laravel Developer April 2023 – Present
Stunning Solutions

- Worked on multiple enterprise-level applications including dynamic **certificate generation systems**, **form builders**, and **sales management platforms**, serving industries like ISO certification, eCommerce, and finance.
- Built **Node based workflow** for event based triggering notifications which also create report charts.
- Developed a dynamic application and **form builder** platform with **role-based access**, custom notifications, and live chart/data visualizations.
- Handled high-volume data in a **sales system** (400K+ records) for a chemical ecommerce, managing lead-to-order workflows, invoice/quotation generation, and optimized query performance.
- Designed a multi-step **approval workflow system** with digital signatures, audit logs, and dynamic role control for finance documentation (GN, PN, RN).
- Developed a student **management system for attendance, fees based on sessions** and due and credits.

PHP / Laravel Developer Jan 2023 – April 2023
Bracketworks

- Worked on an **Custom CMS** web application where I mainly handled the **frontend development** based on **Figma**.
- Built an admin panel for **flow and data management for an NGO** which based on children care.
- Converted Figma designs into responsive **HTML**, **CSS**, and integrated them into **Laravel** views.
- Built most of the website's **UI components**, such as product cards, filters, dashboards, and enquiry forms.
- Also contributed to backend tasks like **customer enquiry module** and managing **user roles and permissions**.

Web Developer Sept 2022 – Dec 2022
PathshalaHub

- Focused on **frontend development** using **Tailwind CSS**, building responsive and user-friendly interfaces with **React** and integrating them smoothly into the **Laravel** backend.
- Integrated multiple **REST APIs** to fetch and display dynamic data, ensuring smooth communication between the frontend and backend systems.

PROJECTS

RNR Project – Dynamic Form & Workflow Platform
Built real-time, configurable charts and tables where type, color, and logic were controlled.

- A Dynamic application with customizable forms (inputs, etc), role-based access, and flexible submission logic.

Sparsh Project – Student Management System
Implemented a calendar view to track holidays and student leaves interactively.

- A student management system with attendance-based fee calculation logic.

NHIT Project – Role-Based Approval Workflow System
Managed role-based approvals, status tracking, and workflow logic across four major entities.

- A multi-step approval flow for Green Notes, Payment Notes, etc., with dynamic rules and PDF signature integration.

EDUCATION

SOL - affiliated by Delhi University Delhi
Bachelors *Jul 2021 – May 2024*
